EXPERIENCE

Freelance Software Engineer, Self-Employed

May 2022 - Present

- Built TypeScript, JavaScript, and Kotlin applications, adapting across diverse tech stacks.
- Developed and maintained React and Node.js applications, delivering customized client solutions.
- Created blogs with CMSs that auto-update with new posts, simplifying content workflows.
- Designed and implemented APIs for smooth data flow between frontend and backend systems. Optimized application performance and crafted intuitive user interfaces for better usability.
- Communicated effectively and solved problems collaboratively to meet client goals.
- Leveraged various technologies to enhance full-stack expertise and deliver user-focused solutions.

Lift Operator, Powderhorn Mountain Resort, Mesa

Nov 2023 - Jan 2024

- Ensured safety and efficiency while resolving challenges
- Provided excellent customer service and worked with diverse teams.

Lead Engineer, Intelliprocessing, Remote

May 2022 - Nov 2022

- Developed dashboards for secure, actionable data processing
- Designed APIs for user interactions.
- Researched and implemented database solutions for Amazon VPC.
- Collaborated with teams to align technical solutions with business goals.

Software Engineer, Fluentstream, Denver

May 2019 - Feb 2022

- Developed endpoints and features for all company products to meet client requirements.
- Communicated development needs with the business and maintained SaaS mobile applications
- Improved system performance and resolved technical issues to enhance product reliability

Volunteering/Projects

Maintainer, node-strava/node-strava-v3

- Contributed to breaking releases by improving usability and removing deprecated callback support

NPM Package: react-dynamic-input

- A published NPM package that allows users to dynamically create multiple input boxes with customizable options such as button and text tooltips
